

Penny Spinner Card

- (1) Use Word Window punch to punch a track into your card stock. Stamp card stock as desired.
- (2) Sandwich a Stampin' Dimensional between two pennies.
- (3) Insert pennies into slot, carefully pulling at edges to avoid tearing card stock.
- (4) Stamp and cut out your spinner image. Adhere to penny.
- (5) Adhere card stock piece with spinner to your card using Stampin' Dimensionals.

TIP: Essentially, you need to create a track for the penny to ride on; it can be any shape. Consider a circle, angle, or curve - use an X-acto knife or several dies to help. You need a 3/8" wide shape as a track.
